

MINE DUTY PRIMARY SCRAPPER

Mine duty primary scraper for belt conveyor, complete with extra heavy duty high abrasion resistant urethane blade, for real tough applications without damaging the belt.

Available with our extra heavy duty tensioning system, allowing very precise adjustment of the blade pressure on the belt.

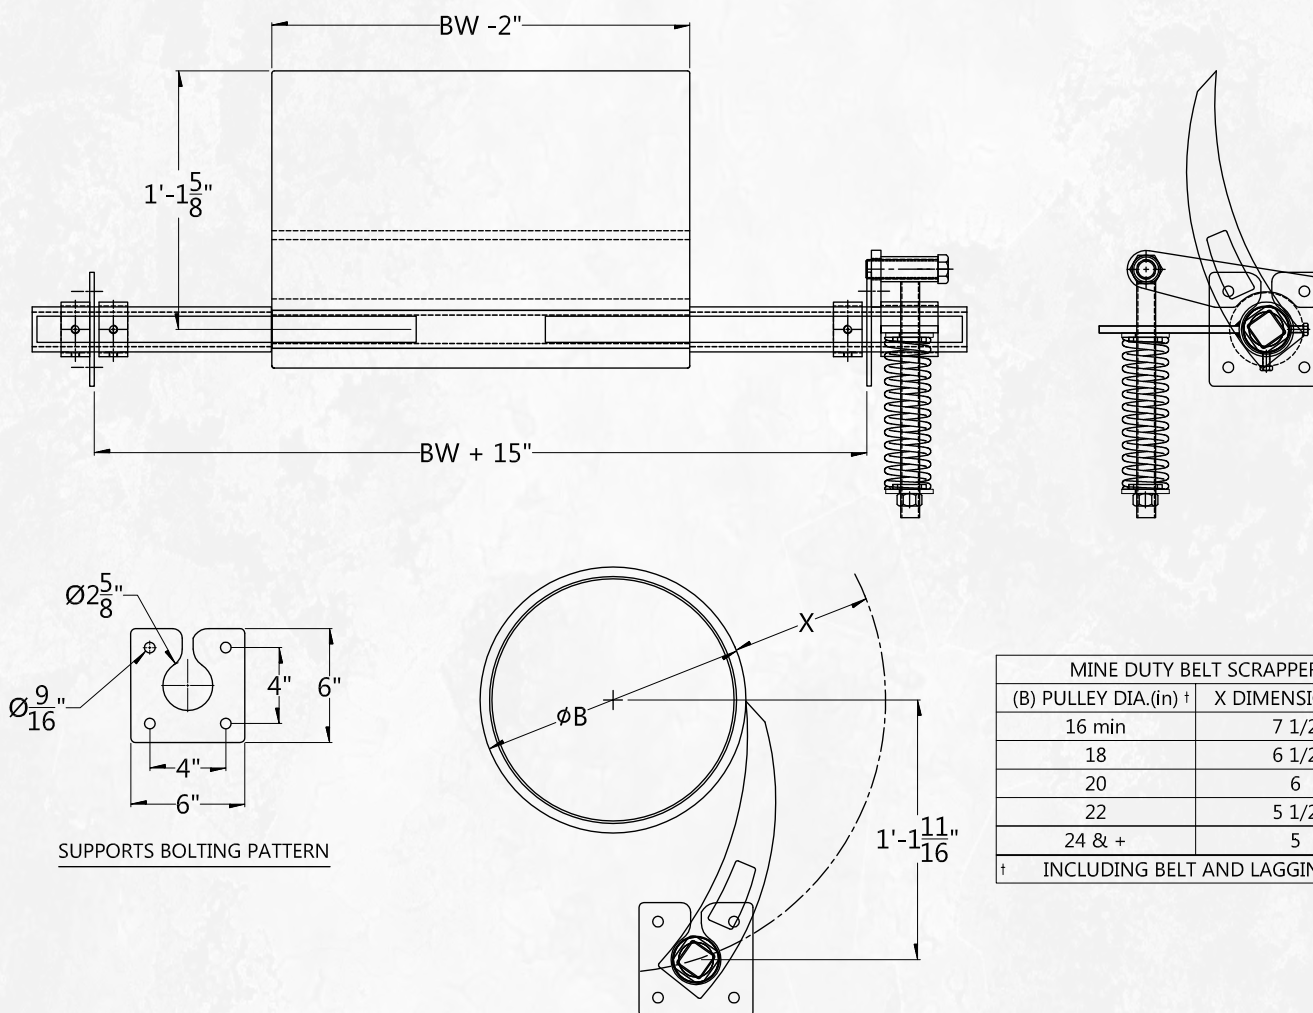

Urethane blade, mounted on a steel tubing, gives an extra rigidity to the assembly for extreme operation conditions. Blades are easily replaceables by removing inserts on each side of the blade tubing.

Double tensionners for blade 48 inches and over

Powder coated finish of all the tensionner parts.

Available for belt width from 18 to 84 inches wide.

For severe corrosion conditions, complete urethane covering of steel parts in contact with the material is available as an option. (as shown on the above picture)
